

Ex-cel® PVC Panels and Trim provide the look and feel of wood, with the durability of PVC. It cuts, routes and handles like a premium wood product, without ever splitting, rotting, warping or swelling. Approved for below grade and suitable for ground contact, it is insect and moisture resistant and provides minimal expansion and contraction. With cellular PVC technology and a UV resistant closed cell structure, Ex-cel PVC Trim is ideal for use on fascias, door and window trim, rake and corner trim, column wraps, porch railing, siding – board & batten and soffits – beaded plank. It carries a lifetime product warranty and although it doesn't require painting for protection, is paintable for all your custom decorating needs.

Wood and engineered trims can't stand up to Ex-cel PVC Trim's lasting power. In addition to the properties listed below and inside, consider Ex-cel PVC Trim's fire resistance. Wood typically falls below the oxygen index value of 28% that is considered self-extinguishing. PVC, the material used in Ex-cel PVC Trim, has an oxygen index value well above the self-extinguishing level.

A requirement of only 1/4" distance from the edge for face nailing, is the only place that Ex-cel PVC Trim, wood and Engineered Trims are alike. Only Ex-cel PVC Trim offers the rest...

- Never absorbs water
- Resists rot
- Is Insect Proof
- Withstands direct contact with moisture
- Is approved for below grade and/or ground contact
- No pre-drilling required to avoid splitting when edge nailing

Minimal maintenance

Cut - Rout - Nail

Mill - Screw - Glue

**Did we mention it lasts
a lifetime?**

SETTING THE STANDARDS FOR PVC TRIM AND PANELS

TRIMBOARDS

Ideal for fascia, decorative trim and columns, fluted and flat casings, custom millwork, moldings, soffits and many other applications. They never need replacing. Available smooth or woodgrained one side.

Ex-cel PVC Trim Standard Sizes

Thicknesses: 5/8", 3/4", 1"

Board widths by 18' long available in each thickness: 2-1/2", 3-1/2", 4-1/2", 5-1/2", 7-1/4", 9-1/4", 11-1/4" 4" and 6" formed corners in 10' and 20' lengths

PANELS

Perfect for custom millwork, arch window trim, soffit and porch application. Ex-cel Panels can be used anywhere you would use plywood panels. Ex-cel Panels maintain all the important properties and benefits of the other Ex-cel products: resistance to moisture, salt & insects.

Ex-cel Panels

Thicknesses: 3/8", 1/2", 5/8", 3/4", 1"

Panel sizes: 4' x 8', 4' x 9', 4' x 10'

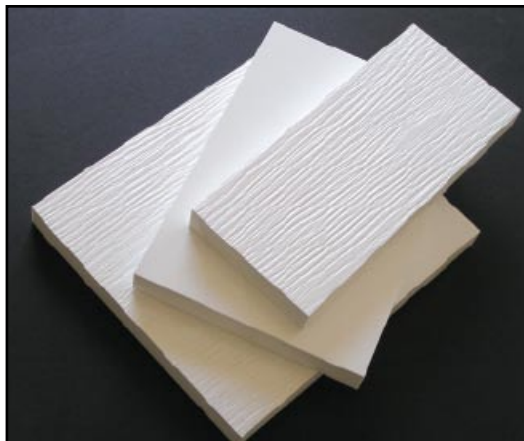

Note: All panels are smooth both sides, or woodgrained one side. Custom sizes available on special orders.

EDGE & CENTER BEAD

Perfect for porch ceilings and soffit applications. Has the same outstanding properties as other Ex-cel Trimboards. It is fabricated for tongue-and-groove installation.

Ex-cel PVC Edge & Center Bead and Beaded Panels Standard Sizes

1/2" x 3-1/2" x 18', 1/2" x 5-1/2" x 18' and 4' x 8' Panels

COLUMNS

Ex-cel PVC Trim fits snugly around columns without warping or cupping and goes on straight without twisting. Great for use directly over masonry, concrete or grade.

CUSTOM MILLWORK & GINGERBREAD

Ex-cel PVC Trim can be bent or shaped for curved applications and is a consistent thickness without knots making it easy to cut and rout. Available in 4-ft. wide sheets, with a consistent cell structure makes Ex-cel PVC Trim ideal for a multitude of designs and uses.

FASCIA AND RAKE BOARDS

The uniform size and shape of Ex-cel PVC Trim, makes it a great use for fascia and rake boards. It's perfect for moisture-prone environments and doesn't require painting. It never warps, splits or twists and rips easily for custom widths. Ex-cel PVC Trim accepts nails and screws just like wood, making it ideal in application.

PORCH CEILINGS, SOFFITS & WAINSCOTING

With the look of real wood, along with resistance to moisture and insects, Ex-cel PVC Trim is the perfect trimboard to use for porch ceilings, soffits and wainscoting applications. It's 4-inch or 6-inch beaded and can be painted any color making it perfect for ceilings, and is readily available in standard board and sheet sizes reducing waste.

GARAGE, WINDOW & DOOR OPENINGS

Because it can be used in direct contact with masonry or concrete, along with the fact that Ex-cel PVC Trim won't swell or warp in moist environments, it's perfect for garage, window and door openings. It's easily routed for crisp clean moldings or baseboards.
