EXTERIOR PVC CLASSIC WHITE TRIM, MOULDING & SHEET

THE EX-Cel FAMILY OF EXTERIOR PVC TRIM IS THE MOST COMPLETE PACKAGE AVAILABLE FOR ANY EXTERIOR APPLICATION

EX-Cel offers Exterior Trim in a range of thicknesses, widths, textures and finishes. With a full complement of PVC sheet, trim, corners, mouldings and bead board EX-Cel will finish any project completely and professionally. Available in either a smooth or wood grain texture EX-Cel products can be cut, mitered, nailed, routed and sanded just like traditional wood trim products. Unlike traditional wood products EX-Cel can also be bent for curved applications and does not need to be painted. It will never rot, crack or deteriorate even in high moisture applications. Produced from one of the most durable building materials, PVC, EX-Cel is truly the low maintenance choice for exterior trim.

Designed to be used with all types of exterior siding – wood, fiber cement, brick, stone, stucco or vinyl – EX-Cel offers the most complete pvc trim program available.

EX-Cel PR

For projects which are going to be field painted EX-Cel PR offers the ultimate time saving solution. While as flexible in application and workability as EX-Cel Classic; EX-Cel PR is manufactured with a durable skin and arrives at the job site pre-sanded and ready to accept a finish coating. Pre-sanding saves labor during the installation and provides a surface that is ideal for a coating application.

EX-Cel CLASSIC

In a traditional white color, EX-Cel Classic Trim completes any exterior trim job beautifully. With matching moldings, corners and sheet stock EX-Cel

Classic will resist chipping, flaking, twisting or rotting for years to come and require no additional maintenance or field finish. All EX-Cel products are covered by a limited lifetime warranty.

THE EX-Cel EQUATION

Beyond standard trims, the EX-Cel Equation, which includes our Channel Trim and Push-Lock Insert, provides the hand-crafted look of a fitted butt joint. The EX-Cel Equation allows EX-Cel channel trim to be installed after the siding for faster installation and greater job efficiency. The finished installation offers the look of a traditional wood trim.

YOUR COMPLETE SOURCE
